### **BST Test Cases**

#### **Initial BST**

### • Función - visit() - O(n)

| Núm. de caso | Valor ingresado | Valor esperado              | Valor recibido                  |
|--------------|-----------------|-----------------------------|---------------------------------|
| 1            | 1               | 62157981114                 | 6 2 1 5 7 9 8 11 14             |
| 2            | 2               | 1 2 5 6 7 8 9 11 14         | 1 2 5 6 7 8 9 11 14             |
| 3            | 3               | 1 5 2 8 14 11 9 7 6         | 1 5 2 8 14 11 9 7 6             |
| 4            | 4               | 6<br>27<br>159<br>811<br>14 | 6<br>2 7<br>1 5 9<br>8 11<br>14 |

# • Función - ancestors() - O(n)

| Núm. de caso | Valor ingresado | Valor esperado    | Valor recibido    |
|--------------|-----------------|-------------------|-------------------|
| 1            | 6               | NONE              | NONE              |
| 2            | 11              | ->6<br>->7<br>->9 | ->6<br>->7<br>->9 |

## Santiago Vera Espinoza Programming of Data Structures and Fundamental Algorithms

A01641585 Prof. Jorge Enrique González Zapata

| 3 | 8 | ->6<br>->7<br>->9 | ->6<br>->7<br>->9 |
|---|---|-------------------|-------------------|
| 4 | 5 | ->6<br>->2        | ->6<br>->2        |

# • Función - whatLevelAmI() - O(n)

| Núm. de caso | Valor ingresado | Valor esperado | Valor recibido |
|--------------|-----------------|----------------|----------------|
| 1            | 6               | 1              | 1              |
| 2            | 11              | 4              | 4              |
| 3            | 8               | 4              | 4              |
| 4            | 5               | 3              | 3              |

### • Función - height() - O(n)

| Núm. de caso | Valor ingresado      | Valor esperado | Valor recibido |
|--------------|----------------------|----------------|----------------|
| 1            | NONE                 | 5              | 5              |
| 2            | tree.insertNode(15); | 6              | 6              |
| 3            | tree.insertNode(17); | 7              | 7              |
| 4            | tree.insertNode(21); | 8              | 8              |
